Weed Control Accessories (Weed Removal Tools)

※ Eradicate weeds using nothing but steam. The Weed Control Accessories inject steam into the root of weeds, delivering a concentrated dose of high temp moisture that begins killing plants immediately, all without the use of toxic herbicides. In a matter of days, the targeted plants will wilt and die, killed from the roots so the plant won't continue to regrow.

[85-56026] LT5 Water Softener with Bracket

Minimize maintenance, increase the lifespan of your machine, and save money. The biggest challenge to OPTIMA STEAMER owners is dealing with scale buildup as a result of hard-water minerals in water. The best means of improving your water quality, and we only recommended solution for preventing is to use a salt-based water softener and we've got one that will work great with the OPTIMA STEAMER—the LT5. The LT5 is powered by typical salt and will last most operators 1-2 weeks before needing to regenerate. What's better is that this filter was designed to be installed on the back of your OPTIMA STEAMER and to provide a mobile water softening solution that goes where your Optima goes. End the constant battle with scale buildup and get the best performance out of your machine. Connects via the Direct Water Feed connection. Recharge frequency varies based on water hardness and usage. Recharge using table salt.
