## Introduction

The Optima Steamer continues to pursue environmentally friendly and effective cleaning solutions. Optima Steamer which is safe, durable and easy to use will support your cleaning operations for many years to come.

## Applications

The Optima Steamer is capable of generating continuous, super-heated vapor steam. The Optima Steamer is specifically used for various cleaning applications including cleaning machinery & components, washing vehicle exteriors, interiors, engine compartment, glass, metal surfaces, windows, wheel wells, vents, deodorizing bad odors, sanitizing hazardous food-borne bacteria from food processing equipment, removing weeds and more.

## Product Specifications

#### (1) OPTIMA XD

| Model                                 | OPTIMA XD                                                                   |                        |           |  |
|---------------------------------------|-----------------------------------------------------------------------------|------------------------|-----------|--|
| Working Pressure                      | 7~8.5 kgf/cm² / Max 9.5 kgf/cm² (99~120.8 psi / Max 135.1 psi)              |                        |           |  |
| Steam Vessel Temp.                    | 178°C m                                                                     | nax.200℃ (352.4 °F max | .392 °F)  |  |

The manufacturer assumes no responsibility for any consequential losses or damages including but not limited to injury of persons, loss of business or properties which may occur through use of this product without consulting the User's Manual, regardless of any failure to perform on the part of this product.

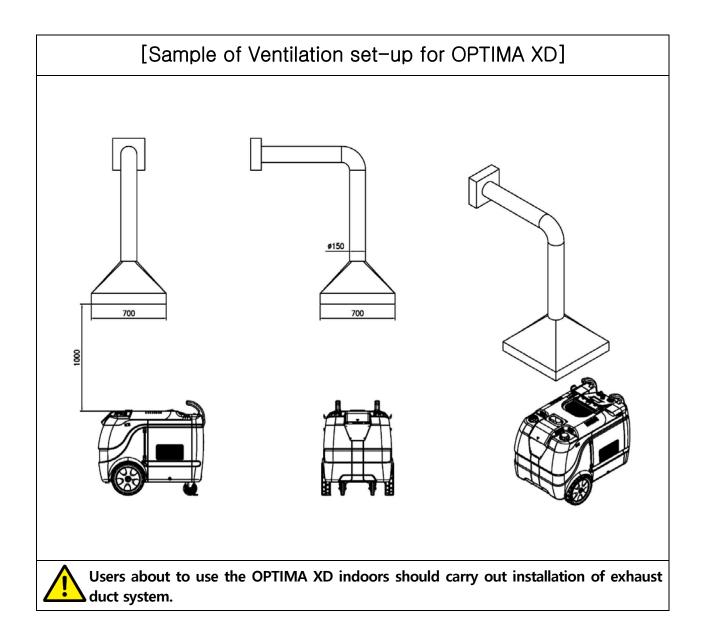

#### GENERAL SAFETY RULES

- DO NOT direct, air or discharge the steam jet at itself, persons, animals or live electricity.
- Use and store the product on a level ground (surface) only.
- DO NOT use the product if any part, power cord, safety device, hose or spray gun are visually damaged or suspected of being damaged.
- DO NOT use the product in rainy or snowy weather outdoors. This product is not weather-proof or water-proof.
- Never leave the product unattended while operating.
- Make sure to comply with safety rules in the event of operating in a danger area.
- Never use the product in an area where a fire and explosion hazard exists.
- DO NOT use the product below 0°C (32°F) or in extremely cold weather.
- DO NOT allow water sit in the water pipelines and steam vessel if leaving the product non-operational in cold weather.
- Store the product at a room temperature(See page 23, "Freeze Prevention")
- Heavy object. Be cautious when carrying or lifting. (See page 2, "Product Specifications")
- Unplug the product from its power source and release all the remaining steam from the product before carrying.

- Use only "Clean" and "Soft" water in the product.
- Use of a water softener is recommended to prevent scale build-up
- Using any kind of boiler water treatment (solution) can help decrease scale build-up.
- DO NOT add detergent, wax or any chemical liquid in the water tank or steam vessel.
- DO NOT use distilled water or filtered water below 15 ppm.
- Connect to electrical power according to the product specifications. (See page 2, "Product Specifications")
- Connect to the electrical power outlet installed in accordance with IEC 60364.
- Be cautious of the risk of electric shock in the event of connecting to electrical power.
- Ensure the connection status of Grounding Chain and Ground Wire to the product to avoid static shocks.
- Users about to use the product should carry out a visual check for insecure cable at entry to a plug, evidence of poor wire connections or evidence of appliance or plug overheating.
- Make sure that all the switches on the product are off before plug-in power cables.
- In the event of using extension cord, make sure of a ground-fault circuit interrupter (GFCI) built in.
- Make sure extension cord is constructed of proper diameter in accordance with the electrical specifications. (Contact manufacturer or distributors for right extension cord)
- Keep out of reach of children and pets.
- This product is not intended for use by children, or by persons with reduced physical, sensory or mental capabilities, or by person lacking experience with the product or knowledge of the product's use, unless they have given supervision or instruction concerning the use of the product.
- Wear appropriate protective gear to protect users' ear, eyes and hands in operation.
- According to steam pressure, noise can be reached to 95 decibel(dB).
- DO NOT use the product within the range of persons who are not wearing any protective gear.
- Hot surface. DO NOT touch steam vessel, steam valves, steam hoses and guns in operation.
- Replace steam hoses immediately if ruptured.
- Use manufacturer approved spare parts and accessories including steam hoses, steam guns and power cables.
- Unplug the product from its power source and allow it to cool before carrying out any maintenance.
- Never disable sensors in order to bypass an alarm signal.
- Open the drain valve and release all remaining water from the steam vessel after users shut down the product completely. (See page 16, "Shutdown Operation")
- Never spray steam over cleaning hazardous materials or surfaces containing hazardous substance including asbestos.

#### SAFETY RULES for OPTIMA XD

- Use clean diesel only.
- Make sure that all the switches on the product are off before refilling diesel.
- Burn hazard. DO NOT touch exhaust flue in operation.
- DO NOT use the product within a confined space.
- DO NOT breathe in smoke from the exhaust flue to avoid smoke inhalation.
- Use the product in well-ventilated indoor area and install exhaust duct system if necessary. (See page 8, "Ventilation set-up")

## Included Items and Accessories

\* Included items and accessories are subject to change without prior notice.

## Pre-Start Procedure

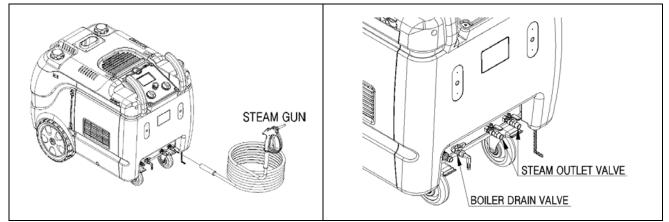

Wear appropriate protective gloves before using the product.

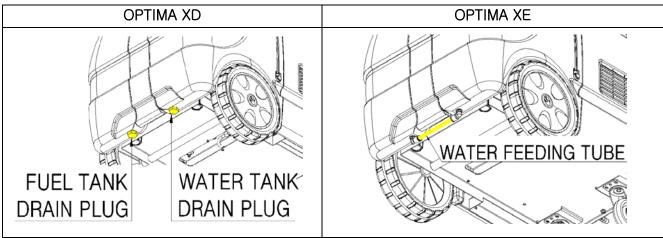

Surface of exhaust flue and valves may be hot. Take precautions when users resume operations.

Steps:

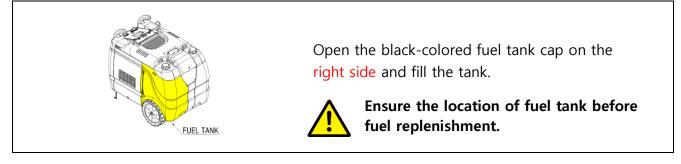

- 1. Connect steam hoses and guns to the steam outlet valves. Ensure a tight connection using appropriate tools.
- 2. Ensure that valves including drain valve, steam outlet valves are fully closed.

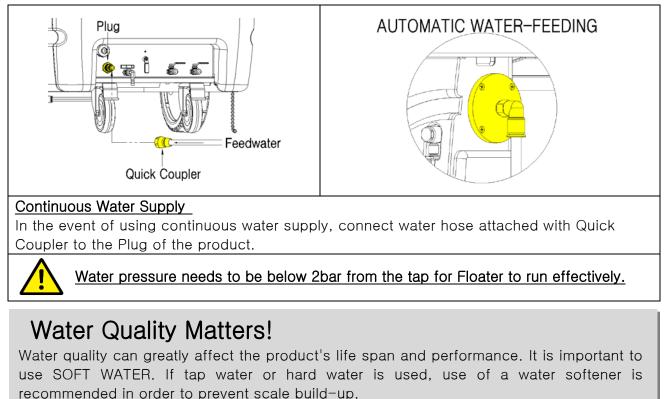

3. Ensure that tank drain plugs or water feeding tube are well-connected. (See illustrations below)

4. Fill the fuel tank. (\*For OPTIMA XD)

5. Fill the water tank with clean water. When tap water or hard water is used, use of a water softener is recommended to prevent scale build-up.

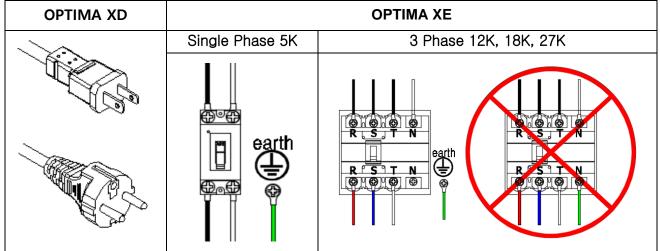

<u>DO NOT use distilled water.</u> <u>DO NOT add any detergent, wax or cleaning additives into the water tank</u> <u>or steam vessel.</u> <u>The use of water temperature above 5°C (40°F) recommended.</u> Use filtered water above 15 ppm.

6. Check for electrical specifications before connecting to electrical power outlet.

In the event of using extension cords, take waterproof measures on the electrical sockets and plugs.

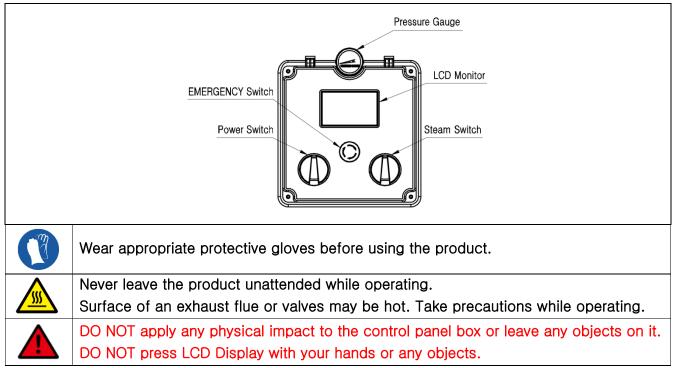

\* Alert users to the presence of "dangerous voltage" inside the product that might cause bodily harm or electric shock.

For the use of OPTIMA XE, make sure to connect the GROUND WIRE(G) to GROUND TERMINAL. Never connect GROUND WIRE to NEUTRAL(N) TERMINAL.

## Standard Operating Procedure

<u>Make sure to advance the steps of Pre-Start Procedure before users follow Standard</u> <u>Operating Procedure. (See page 10, "Pre-Start Procedure")</u>

## Adjust air flow (For OPTIMA XD)

Amount of air intake consumed can be subject to differ depending on ambient environment.

#### (X Combustion gas should be visually transparent)

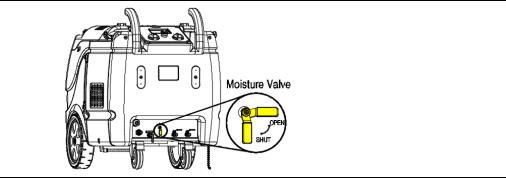

## Moisture Control

Users can spray moisturized steam (wet steam) by opening the moisture control valve. In the event of cleaning interior surfaces or water sensitive areas, ensure that the moisture control valve is fully closed to minimize surface moisture.

Using two steam guns with the moisture control valve open continuously may consume steam faster than what can be replenished. Open the moisture control valve by 1/3 allowing pressure to build up.

## Emergency stop

1. In case of a failure in the product or an emergent situation occurred, push the emergency stop button in.

2. Overhaul the failure, take necessary measures and resume the emergency stop button.

| How to use emergency stop button                                              |                                                        |  |  |

| <b>a</b> main power enclosure.                                                |                                                        |  |  |

## Pause operation

- 1. Switch off the STEAM.
- 2. Close the steam outlet valves and release all the remaining steam from the hoses by pulling the gun trigger. It prevents remaining of condensed water residue in the steam hoses afterwards and increases the life span of the steam hoses and guns.

## Shutdown operation

- 1. Switch off the STEAM.
- 2. After blower fan stops automatically (applied to XD model), switch off the POWER.
- 3. Release steam from the steam vessel by pulling the gun trigger until the pressure drops down to 1~2 kgf/cm²(28.4 psi).
- 4. Close the steam outlet valves and release all the remaining steam from the hoses by pulling the gun trigger.
- 5. Release remaining steam from the steam vessel by opening the drain valve.

Keep drain valve open for the next operation

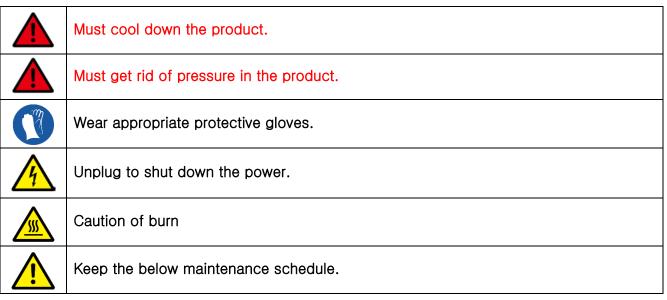

DANGER. Burn hazard! Hot steam. Keep hands clear.

6. In cold weather, take precautionary measures to keep water pipes from freezing and bursting. (See page 23, "Freeze Prevention").

## Maintenance

\*For your safety, the Safety Relief Valve must be replaced when a leak is present. If no leak occurs, the Safety Relief Valve must still be replaced every 3 years.

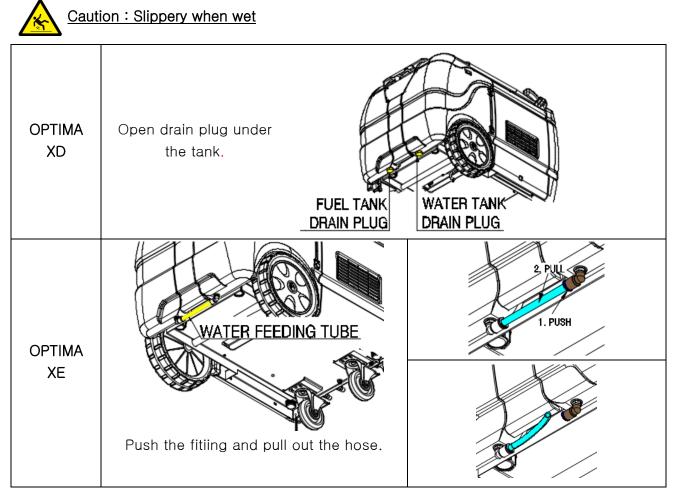

#### A. Drain boiler

- 1. Reduce pressure below 2 kgf/cm²(28.4 psi)
- 2. Open the drain valve until water drained out.
- 3. Leave drain valve open until the next use.

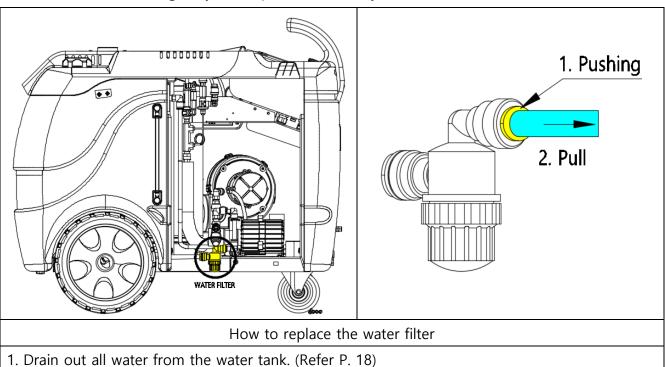

#### B. Drain Water / Fuel tank

Open drain plug under the tank or disconnect the tank connection hose.

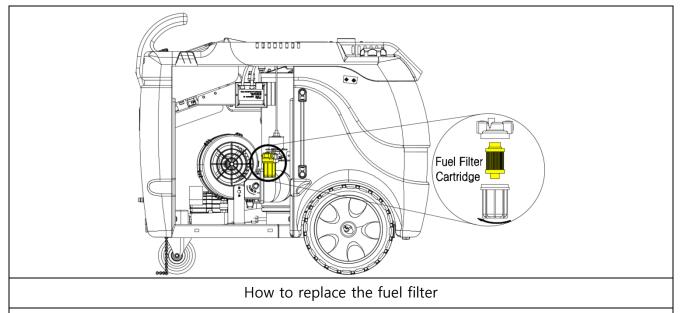

#### C. Replace filters

Check the water filter regularly and replace if necessary.

- 2. Push the water filter fitting (yellow part) and pull out the water tube(blue part).
- 3. Replace with a New filter.
- 4. Push the water tube to filter until it is unable to be pulled out by hand.

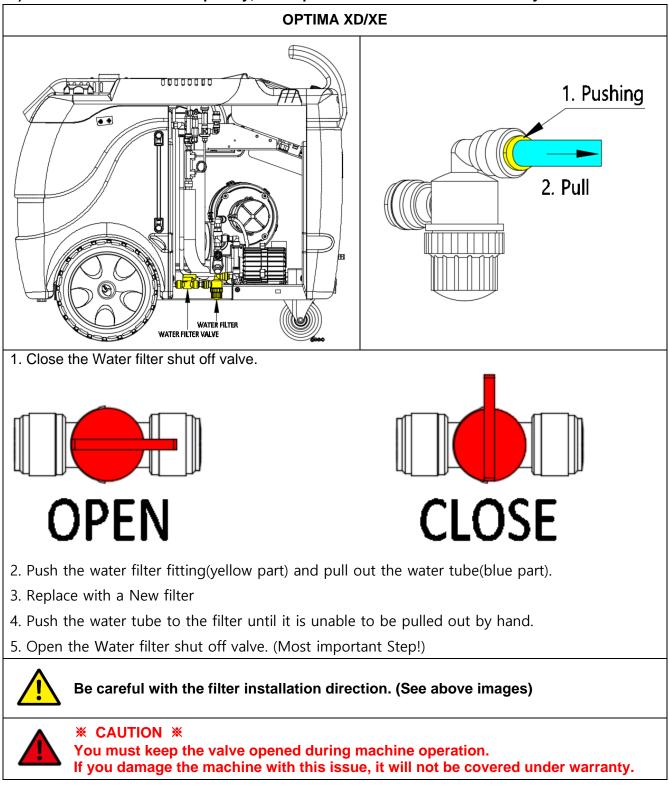

There is fuel filter for **OPTIMA XD**. Please check it regularly and replace it if necessary.

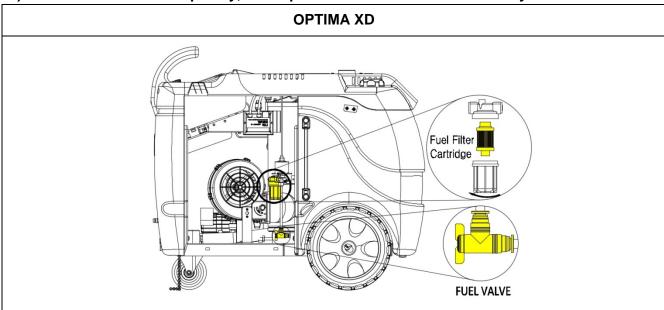

- 1. Drain out all fuel from the fuel tank. (Refer P. 18)
- 2. Disassemble the lower part from the fuel filter.
- 3. Replace with the fuel filter cartridge.
- 4. Reassemble the fuel filter in a reverse way.

#### C-a. Replace filters (US VERSION)

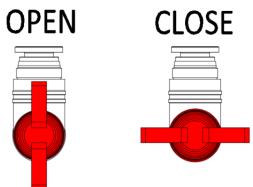

#### 2) Check the fuel filter frequently, and replace it with a new filter if it's dirty.

1. Close the Fuel filter shut off valve.

- 2. Disassemble the lower part from the fuel filter.
- 3. Replace with the fuel filter cartridge.
- 4. Reassemble the fuel filter in a reverse way.
- 5. Open the Fuel filter shut off valve. (Most important Step!)

#### Be careful with the filter installation direction. (See above image)

#### **\* CAUTION \***

You must keep the valve opened during machine operation. If you damage the machine with this issue, it will not be covered under warranty.

#### D. How to check and clean water probes

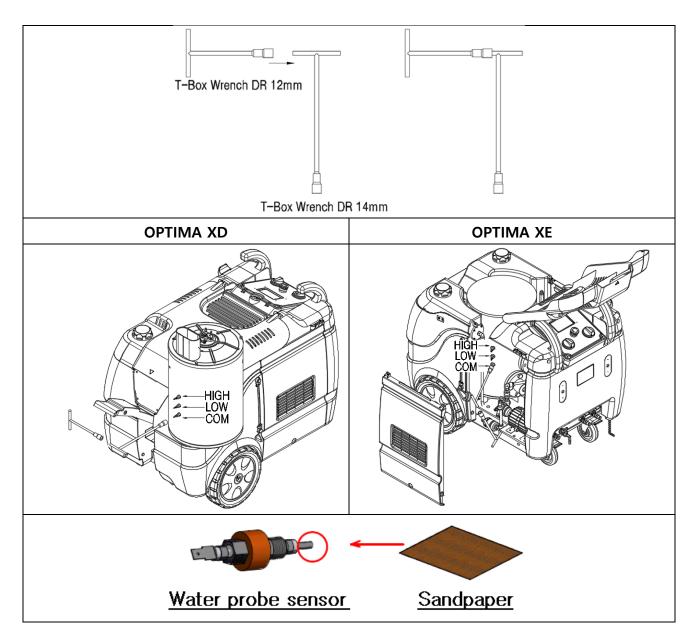

There are 3 water probes (high/common/low).

Minerals in the water or various foreign materials would be hardened and this may make water probe's malfunction.

#### Requires : 14mm long box wrench or Spanner, Sand paper, Teflon tape.

#### Procedure:

- 1. Unplug the power plug and then remove pressure completely by opening steam valve.
- 2. Open the drain valve and drain out all water from boiler.
- 3. Detach top cover and front cover. Then detach the all wires from water probe sensors.
- 4. Disconnect water probe sensors from steam vessel by 14mm long box wrench.
- 5. Clean the water probe sensor by soft sand paper. Replace it if necessary.
- 6. Wind Teflon tape 6 times on the thread in order to prevent leakage.

## Freeze Prevention

In cold climates, it is necessary to store the product in an area where a temperature is above freezing.

Follow the below steps to protect your product against freezing and bursting.

#### Steps:

#### 1. Drain the steam vessel

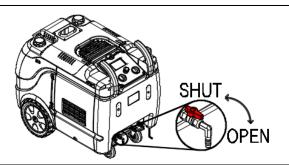

Reduce pressure under 2 kgf/cm<sup>2</sup>(28.4 psi) and then drain out water from the steam vessel by opening a drain valve. Leave the drain valve open until the next use.

Wear appropriate protective gloves for hands because steam is very hot.

Leave drain valve open until next use.

#### 2. Drain Water tank

Open a drain plug or water tank connection tube under the water tank.

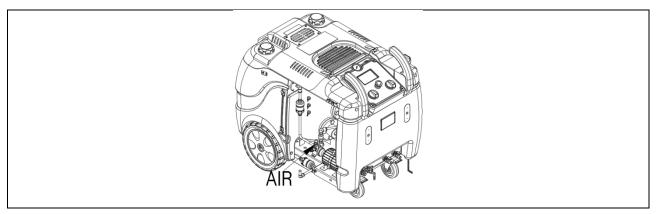

Caution : Slippery when wet.

| optima XD | Open drain plug under<br>the tank.       |
|-----------|------------------------------------------|
| OPTIMA XE | Push the fittiing and pull out the hose. |

#### 3. Drain the water feeding lines and the water pump.

Open the drain valve, then disassemble/detach water feeding line like the below picture and drain all remaining water using compressed air. Keep drain valve open until next use.

#### 4. Storage

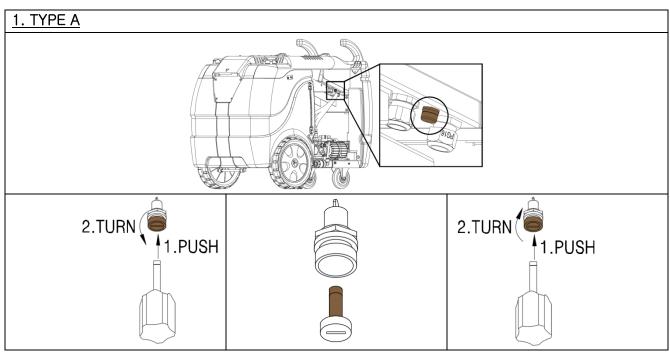

Keep Product in a warm place to prevent for being frozen.

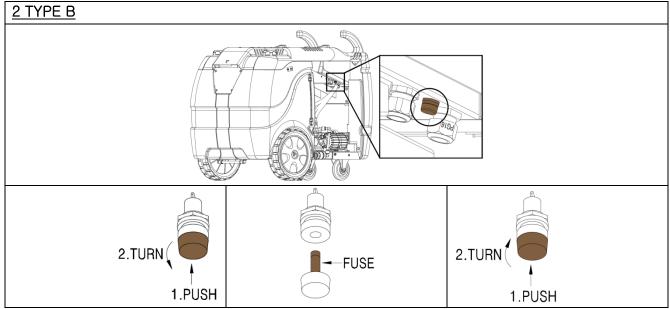

Pipe line or parts can be ruptured, if product is frozen badly. Freeze can cause malfunction. If product would be frozen, do not operate it immediately.

Put the product in warm place in order to thaw. After that, check if there is any damage. If the machine is visually damaged or performs abnormally, immediately turn off the machine and contact your distributor or manufacturer.

## Fuse change

- 1. Push and turn anticlockwise the fuse cap with a screw driver to take out.
- 2. Replace into a new fuse.
- 3. Push and turn clockwise the fuse cap with a screw driver to lock.

- 1. Push and turn anticlockwise the fuse cap to take out.
- 2. Replace into a new fuse.
- 3. Push and turn clockwise the fuse cap to lock.

## Troubleshooting Guide

When a malfunction occurs, refer to the troubleshooting guide below. If the problem persists, please contact your local distributor and report the problem by referring to the ERROR CODE.

## Symbol Description

Alarm beeps continuously

Continuous pressure increases over 9 bar (130 psi)

## Error display and Solution

|   | Description | Nothing on LCD screen and no alarm sound when POWER & STEAM switches are on.                                         |                                 |  |  |  |

## Service Request

Your machine has a defect or broke down?

Simply register your service requirement by scanning here and SJE

Service center will contact you as quickly as possible to provide further information.

## **OPTIMA STEAMER™ Limited Warranty**

SJE Corporation Ltd. hereby warrants that new Optima Steamers purchased directly from SJE Corporation Ltd., headquartered in Busan, South Korea will be free from defects in material and workmanship for the period of time stated below, subject to certain limitations.

#### **OUR WARRANTY POLICY**

This warranty is not transferable and covers replacement parts only. This warranty does not cover any consequential damages or business loss.

#### THE PERIOD OF WARRANTY

The warranty on your Optima Steamer is twelve(12) months(6months for authorized distributors) from the date of purchase by the original owner against defects in material and workmanship.

#### **GENERAL EXCLUSIONS**

#### General exclusions from this warranty shall include any failures caused by:

- a. Installation of parts, attachments or accessories that are not original to the unit or genuine Optima Steamer parts. (i.e. external aftermarket attachments such as exhaust duct extension)
- b. Abnormal strain, neglect, or abuse.
- c. Lack of proper maintenance.
- d. Accident or collision damage.
- e. Changing or altering factory settings without consulting with an authorized technician.
- f. Damage or malfunctions resulting from natural calamity, freezing, theft, accident, vandalism, abuse due to misapplication and/or improper site conditions.
- g. Water damage
- h. Electrical damage from including, but not limited to improper use of extension cords, failure to meet proper voltage requirements, incorrect or insufficient amperage circuit.
- i. Insufficient unobstructed distance on exhaust

#### Items not covered under warranty include:

- a. Parts replaced due to normal wear or routine maintenance including, but not limited to sensors, filters, fuses, valves, pipes, electrodes, cables and fittings (i.e. nipples, couplings, o-rings, etc)
- b. Consumable or wearing items requiring replacement as part of normal operation including, but not limited to steam hoses and guns.
- c. Any transportation or travel costs.
- d. Reimbursement for rental units while repairing warranty items.
- e. Normal maintenance items such as: draining tanks and boiler, descaling, filter and sensor changes, boiler cleaning, tightening and sealing bolts and fittings and others stated in the User Manual.
- f. Failure caused by water scale problem due to local water conditions.
- g. Warranty work completed after 30 days from discovery.
- h. Damage, problems or failure caused by factors external to the Product including, but not limited to, faulty or poor external electrical wiring, incorrect or faulty power supply, voltage fluctuations, over voltage transients or electromagnetic interference, inadequate or faulty water or fuel.

#### CUSTOMER'S RESPONSIBILITY

Under this warranty, the customer's responsibility shall be to:

- a. Operate and maintain the machine as specified in the instructions manual.
- b. Give notice to authorized Optima Steamer dealer or SJE Corporation Ltd. of apparent defects within seven (7) days after discovery.
- c. Provide proof of purchase, purchase date, and serial number of the warranty item(s).
- d. Make the unit available for inspection and repairs at dealer's place or service center. If shipped, transit costs should be prepaid.

For warranty service request, please e-mail tech@sjecorp.com or call +82 51 521 3200.

SJE Corporation Ltd. recommends that you read the Operating Instructions, and in particular the troubleshooting guide on USER'S MANUAL before you make a Warranty service
